

Instructions For Use

EZ Reach™ Split-Sampler Sponge Device

Watch Demonstration Video

US Patent 8,127,627B2

<https://www.worldbioproducts.com/ezreach-splitsampler.html>

1. Label both sample bags.

2. Tear off the top of both bags where indicated. Put aside the empty bag. Pull tabs to open the sponge bag. If needed, add a collection solution to hydrate the dry sponge device.

3. Keeping hands outside the bag, guide the handles out the top of the bag. Grasp the handles above the thumb stop and remove the device.

4. Gently squeeze handles together until they overlap.

5. Press down firmly and flex the handle to ensure the entire sponge paddle makes full contact with the sample surface.

6. Vigorously scrub back and forth in one direction across the sample surface.

7. FLIP the sampling device over. Change direction 90° and vigorously scrub back and forth across the same surface area.

8. Return devices to the bag. Do not insert past thumb stop.

9. SPLIT the samples by pulling handles apart and dividing the sponge paddles along the perforation.

10. With hands outside the bag, hold one sponge and twist off the handle in a counter-clockwise direction.

11. Transfer the 2nd device into the empty sample bag. Do not insert past thumb stop. With hands outside the bag, twist off the handle in a counter-clockwise direction.

12. Roll down the top of both bags several times and fold down the wire ties to close. Send both sample bags to laboratory for analysis.

Limitation of Liability:

World Bioproducts LLC shall not be liable for any special or consequential damages that result from the use of, or the inability to use, these materials or the performance of the products, even if World Bioproducts LLC has been advised of the possibility of such damages. Applicable law may not allow the limitation of exclusion of liability or incidental or consequential damages, so the above limitation or exclusion may not apply to you.

For In-Vitro Use Only

Safety Data Sheets & Certificates of Analysis available upon request.
