

VeriswabTM

Sampler

For Environmental Monitoring

Dacron tipped swab with highly visible blue shaft

The VeriswabTM sampler is ideal for collecting samples from small areas with limited access such as cracks, crevices, and areas with small openings. Veriswab includes a 16x100 mm polypropylene tube and screw cap with an attached Dacron-tipped swab on a high visibility blue shaft. The tube has a flat base that sits stably on a solid surface while a sample is being collected. Choose from multiple media and fill volume options to address common sampling regimes.

Beyond Basic Sample Collection

We design tools to support an **Environmental Monitoring Program** that meet today's unique food safety challenges

EZ Reach™ Sponges

Environmental monitoring requires collecting samples from a wide variety of surfaces, from processing equipment and conveyors, to drains and expansive floor or wall surfaces. The EZ Reach™ sponge sampler family offers a range of sizes and functions to fit most sampling needs. All EZ Reach sponges combine a high purity polyurethane sponge with our patented twist-off handle.

US Patent 8,127,627 B2

PUR-Blue™ Swabs

Whether collecting samples for pathogen detection, plate counts, allergens, or viruses, swabs are ideal for collecting environmental samples from small surface areas as well as the tiny cracks and crevices found throughout a production facility.
