

# Pre-filled FlipRight™ Vials

Practical innovation was built into the design for our new FlipRight Vials. For the user, this simply means a more secure (but easier to open!) locking lid for shipping and storage and greater ability to aseptically open and close the vial.

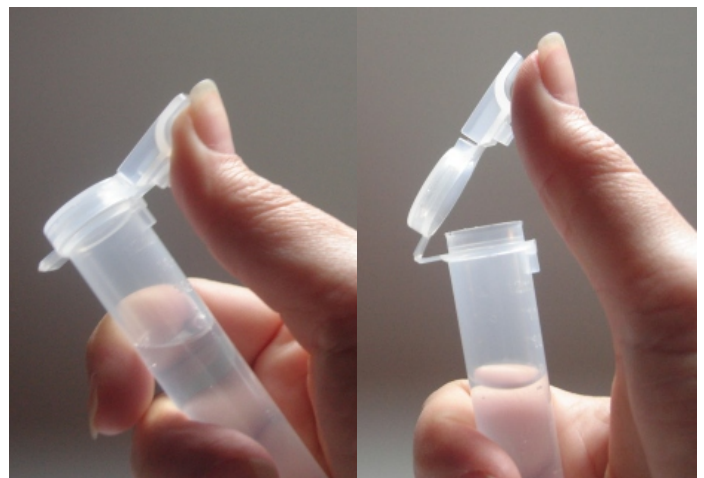

## Easy, Aseptic Opening:

The FlipRight Vial is opened by gently pushing on the underside of the lockdown tab. When the tab is moved upwards, it contacts the lid and then the unique lever design does the difficult lifting part for you, protecting your fingertips from uncomfortable pressure and abrasion and maintaining proper distance from the sterile opening of the vial and its contents.

## The Lockdown Tab:

The lockdown tab is designed so that it can be securely locked into place for shipping and storage, until it is easily and comfortably disengaged for opening. A simple upward “flick” of the lockdown tab with the back of the thumb unlatches the lockdown mechanism.

US 8,590,735 B2

FlipRight Vials are filled with a variety of liquids and volumes. All units are gamma irradiated as the final manufacturing step. Please ask us about a free sample pack!

FlipRight Vials	Item No:	Packaging:
FlipRight Vials with 9 ml Butterfield's Phosphate Buffer	FRV-9BFD	100 per case
FlipRight Vials with 9 ml Buffered Peptone Water	FRV-9BPW	100 per case
FlipRight Vials with 10 ml Buffered Peptone Water	FRV-10BPW	100 per case
FlipRight Vials with 9 ml Letheen Broth	FRV-9LET	100 per case
FlipRight Vials with 10 ml Letheen Broth	FRV-10LET	100 per case
FlipRight Vials with 10 ml D/E Neutralizing Broth	FRV-10DE	100 per case
FlipRight Vials with 9 ml MRS Broth - Coming Soon	FRV-9MRS	100 per case
